

**RHODE ISLAND
MEDICAL IMAGING**

March 11, 2020

Dear Patient,

Rhode Island Medical Imaging (RIMI) wants you to know that your health care and safety are our number one priority. You should feel secure in knowing RIMI has always followed the Centers for Disease Control (CDC) and Rhode Island Department of Health cleanliness guidelines.

Because we are taking the right preventative steps, patients can trust the care they are receiving at any of our sites. Know that during this time of concern, we are taking extra steps including doing deep cleans to all common areas and disinfecting commonly touched items including: elevator controls, handrails, door handles, chair arms and more. Our janitorial services are also following all practices prescribed by the CDC and local and state officials.

RIMI staff has even been reeducated about the importance of washing their hands frequently and using disinfectant wipes and hand sanitizer to keep us all as safe as possible.

You can help stop the spread of germs by wearing a mask or asking for one at our reception desk. Come to your appointment only with those necessary for your care. And be sure and wash your hands and use hand sanitizer. Your health matters to us.

Thank you for being a RIMI patient.

Sincerely,

Siobhain Sullivan
