## RIMI Statement on Social Justice

For over 75 years Rhode Island Medical Imaging (RIMI) has helped patients from Rhode Island and surrounding states receive the medical care they need. People of all ages, genders, colors and creeds come to our offices.

We are in the business of looking at the inside of our patients and not the outside -- and on the inside we are all exactly the same. We would all do well to remember that fact.

RIMI has always treated our patients with care and equality, and we always will.

### **About Rhode Island Medical Imaging:**

Rhode Island Medical Imaging (RIMI) has a network of 12 private state-of-the-art medical diagnostic imaging facilities that are staffed by over 80 board certified radiologists with broad-based experience and subspecialty training in Bone Densitometry (DEXA), Computed Tomography (CT), Magnetic Resonance Imaging (MRI) including the most extensive 3T MRI imaging network in Rhode Island, Mammography, Ultrasound, and X-ray.

RIMI radiologists perform and interpret imaging in Rhode Island at Hasbro Children's Hospital, Miriam Hospital, Our Lady of Fatima Hospital, Rhode Island Hospital, Roger Williams Medical Center, and Women & Infants Hospital, and most recently at Sturdy Memorial Hospital in Attleboro, MA. Most of RIMI's radiologists are also faculty members at the Warren Alpert Medical School at Brown University.

For over 75 years RIMI has provided Rhode Island with imaging excellence (since 1943).
